

Please don't implement any proposal that would lessen Indiana's Telephone Privacy law protections. I've come to enjoy the peace and quiet at home w/o telemarketers interrupting. My incoming telemarketer calls have significantly decreased since's Indiana's law as taken affect. I'd hate to lose that because of a federal ruling that lighten's protections of consumers. A privite home phone line is just that and shouldn't be at the disposal of any unsolicited telemarketers. Please don't let Indiana residents lose what took so long to gain.
